1. NATURE OF OPERATIONS AND GOING CONCERN

Para Resources Inc. (formerly Kensington Court Ventures Inc.) is the parent company of its consolidated group [the "Company"] and was incorporated on April 13, 2010 under the Business Corporations Act (British Columbia). The Company was a capital pool company pursuant to the policies of the TSX Venture Exchange ("Exchange"). On April 30, 2012 the Company completed its Qualifying Transaction by acquiring all of the issued and outstanding shares of Angra Metals Mineração Ltda. (previously named Stronghold Brasil Mineracao Ltda) ["ANGRA"] from Eagle Mountain Gold Corp. [formerly Stronghold Metals Inc.] after obtaining approval from the Exchange. Effective May 2, 2012 the Company was classified as a Mineral Exploration and Development company and is currently listed on the TSX Venture Exchange under the trading symbol "PBR"

The Company's principal business activity is the acquisition, exploration and development of mineral properties.

The registered office of the Company is 1000 – 595 Burrard Street, Vancouver, British Columbia, Canada, V7C 1S8 and its head office is 654-999 Canada Place, Vancouver, British Columbia, V6C 3E1.

The condensed interim consolidated financial statements were prepared on a going concern basis which presumes the realization of assets and discharge of liabilities in the normal course of business for the foreseeable future. The recoverability of amounts shown for exploration and evaluation assets is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development and to place these properties into production, renewal of underlying titles to the mining properties and/or future proceeds from the disposition thereof.

In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future which is at least, but not limited to, twelve months from the end of the reporting year. Management is aware in making its assessment, of material uncertainties relating to events or conditions that may cast significant doubt upon the Company's ability to continue as a going concern, as explained in the following paragraph.

The Company has not yet generated income or cash flows from operations. As at February 28, 2014, the Company had an accumulated deficit of $5,702,660 (August 31, 2013 – $5,510,578). For the six months ended February 28, 2014, the Company incurred a loss of $152,131 (2013 - $3,160,558) and negative cash flow from operations amounting to $112,645 (2013 – $127,046). The Company will require additional financing, through various means including but not limited to equity financing, to continue the exploration program and to meet its future option payment obligations and all of its general and administrative costs. Management intends to raise additional necessary financing through the issuance of common shares. There is no assurance that the Company will be successful in raising the additional required funds.

Although these condensed interim consolidated financial statements have been prepared using International Financial Reporting Standards applicable to a going concern, the above noted conditions raise significant doubt regarding the Company's ability to continue as a going concern.

These condensed interim consolidated financial statements do not reflect the adjustments to the carrying values of assets and liabilities, to the reported expenses and to the financial position classifications that would be necessary if the going concern assumption was inappropriate. These adjustments could be material.

2. BASIS OF PRESENTATION

These condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting. The condensed interim consolidated financial statements should be read in conjunction with the annual consolidated financial statements for the year ended August 31, 2013, which have been prepared in accordance with IFRS as issued by the IASB.

The Company uses the same accounting policies and methods of computation as in the annual consolidated financial statements for the year ended August 31, 2013 except as outlined in Note 3. These financial statements were approved by the board of directors for use on April 28, 2014.

3. SIGNIFICANT ACCOUNTING POLICIES

The following new standards, amendments and interpretations that have been adopted for the Company's current fiscal year have not had a material impact on the Company:

- IFRS 7 *"Financial Instruments : Disclosures"*
- IFRS 10 *"Consolidated Financial Statements"*
- IFRS 11 *"Joint Arrangements"*
- IFRS 12 *"Disclosure of Interests in Other Entities"*
- IFRS 13 *"Fair Value Measurement"*
- IAS 19 *"Employee Benefits"* amendment
- IAS 32 "*Financial Instruments: Presentation"* amendment

The following standard has been issued but not yet applied:

- In the annual period beginning September 1, 2015, the Company will be required to adopt IFRS 9, *Financial Instruments*, which is the result of the first phase of the IASB's project to replace IAS 39, *Financial Instruments: Recognition and Measurement*. The new standard replaces the current multiple classification and measurement models for financial assets and liabilities with a single model that has only two classification categories: amortized cost and fair value. Management is currently evaluating the impact that this standard will have on the consolidated financial statements.

4. EXPLORATION AND EVALUATION ASSETS

Tucumã gold project:

The Company owns a 100% interest in the Tucumã copper/gold exploration project, which consists of six mineral concessions covering a total of 11,456 hectares located in the Carajas metallogenic province in the State of Pará, Brazil. The annual fees for the concessions are approximately $13,000. Prior to a concession expiring, the Company must present to the authority a technical report on the concession, which serves a basis for determining a renewal.

The environment for raising exploration capital for junior exploration companies, especially for those exploring for gold, has become very difficult. During the second quarter of the Company's 2013 fiscal period, management determined that these difficult capital markets meant that it was almost impossible to raise the amount of money that would be needed to continue the diamond drilling program that was started on Tucumã.

Although management considered the results of an earlier program to be partially successful in that some mineralized zones were identified, significant targets were not located. Although management considered the Tucumã property to contain a viable hard rock resource, during the 2013 second interim period, it was determined that the Company could not time implement an appropriate drilling program for hard rock exploration. As such, management at that time did not intend to conduct any further exploration and development on the Tucumã Property and as a result, in accordance with IAS 36 and IFRS 6, the Company wrote down the Exploration and Evaluation Assets for hard rock resource to a nominal value.

During the fourth quarter of 2013, management reassessed this property and prospects and determined that there was a significant zone of mineralized saprolite which has been explored with trenching and auger testing. As such, the Company's changed its development focus with respect to this property and decided to implement a plan that included the establishment of a small scale mining operation targeting the gold in this saprolite.

Given this change in focus, and management's belief that financing for this small scale operation will be available, the Company recommenced capitalizing exploration and evaluation expenditures during the fourth quarter of fiscal 2013.

5. SHARE CAPITAL

Authorized

Unlimited common shares without par value

Issued and fully paid

During the six months ended February 28, 2014 no shares were issued. On March 10, 2014 the Company completed a share consolidation on a 5:1 basis. The Company's warrants and options were also consolidated on a 5:1 basis. All historical figures have been re-stated to reflect this consolidation.

There was a change in control event that took place during the year ended August 31, 2013.

On April 16, 2013, the Company and Eagle Mountain Gold Corp. announced that Lake Forest Development Corp. a company wholly owned by the Company's CEO, agreed to acquire 2.96 million shares of the Company owned by Eagle Mountain in consideration of:

- A cash payment to Eagle Mountain in the amount of $50,000.
- An assignment by Lake Forest to Eagle Mountain of a loan in the amount of $150,000 (the "Assigned Loan") owed by the Company to Lake Forest. The Company agreed that in the event it sells, joint ventures or farms out its Tucumã mineral property located in Para State, Brazil (the "Property"), whether by option, sale or other disposition of either the Property or the quotas of ANGRA, (collectively the "Disposition"), then it shall pay out the Assigned Loan from any proceeds of Disposition in preference to and priority over and exclusion of any other debt.
- The parties have also agreed that in the event the proceeds of Disposition are in excess of the sum of $250,000 in cash, shares or other consideration (the "Additional Consideration"), the Company and Eagle Mountain shall be entitled to share 50% of such Additional Consideration, provided however that in the event the Company spends funds on exploration and development of the Property, then any such funds shall be deducted from the Additional Consideration and repaid to the Company prior to the joint payout of the Additional Consideration.

The total number of Kensington shares purchased by Lake Forest represents approximately 52.75% of Kensington's current issued and outstanding shares. The Kensington shares transferred to Lake Forest were made up of 815,000 free trading shares and 2,145,000 shares transferred in to escrow. Lake Forest's CEO was also a director of Eagle Mountain Gold Corp at the time of the transaction. The effect of the above transaction is that Lake Forest took over as the Company's control person from Eagle Mountain.

Stock options

The Board of Directors of the Company may, from time to time, at its discretion, grant to directors, officers, and technical consultants of the Company, non-transferable options to purchase common shares, provided that the number of common shares reserved for issuance will not exceed ten percent of the issued and outstanding common shares exercisable for a period not to exceed five years from the Company's listing date. The options may be cancelled after the Company has entered into a Qualifying Transaction at the later of 12 months after the Qualifying Transaction and 90 days after the optionee ceases to be a director, officer, or technical consultant. The following is a continuity schedule of outstanding options for the reporting period.

The Company's stock options outstanding as at February 28, 2014 and August 31, 2013 and the changes for the periods then ended are as follows:

(Unaudited - expressed in Canadian Dollars)

	Number of Options	Weighted Average Exercise Price $	Weighted Average Remaining Contractual Life (years)
Balance August 31, 2013	405,800	0.74	3.82
Balance, outstanding and exercisable – February 28, 2014	405,800	0.74	3.32

Stock options outstanding and exercisable at February 28, 2014 are as follows:
